DETAILED ACTION

Double Patenting

Claim 11 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 10. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 – 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jiang et al (5,719,893) in view of Aronson et al (6,483,862).

Art Unit: 2828

Regarding claims 1 and 10 – 13, Jiang discloses a semiconductor with integrated monitoring comprising; a first light emitting semiconductor device (see Figs. 1 – 2) formed on a predetermined substrate (see Fig. 1, Character 101) ; a passivation layer (see Fig. 1, Character 140) formed on top of said first semiconductor device, said passivation layer including a window (see Fig. 1, Character 131). Jiang discloses the claimed invention except for a light-monitoring device formed on top of said passivation layer for monitoring leakage light from said first semiconductor device through said window. It would have been obvious at the time of applicant's invention, to combine Aronson of teaching a light-monitoring device formed on top of said passivation layer for monitoring leakage light from said first semiconductor device through said window with semiconductor because the monitoring device (photodetector) structure that minimizes the capture of the spontaneous emission light output from the light emitting device by the photodetector while electrically isolating the light emitting device from the photodetector . The electrical isolation of the light emitting device from the photodetector results in a four terminal device in which the light emitting device and photodetector may be independently biased, and can therefore be operated at a very low bias voltage.

Regarding claim 2 Jiang disclose a first semiconductor device is an active device (see Figs. 1 and 2, Characters 105 and 205).

Art Unit: 2828

Regarding claims 3 – 5, Jiang discloses a predetermined substrate is GaAs or InP or GaN substrate (Column 2, Lines 40 – 49).

Regarding claim 7 – 10, Jiang discloses a first device is a light emitting device (Column 2, Lines 34 – 50, Column 2, Lines 50 – 53), the light emitting device is a laser, said laser is a VCSEL (see Figs. 1 and 2, Characters 105 and 205).

Response to Arguments

Applicant's arguments filed 9/5/2003 have been fully considered but they are not persuasive. Applicant's arguments with respect to claims 1 - 13 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2828

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
